THE WORKFORCE AT MIDAMERICA IS KNOWN FOR HIGH-PRODUCTIVITY AND RELIABILITY.

To assure a well-skilled workforce for your industry, two of the nation's leading workforce development centers are

located on-site. These institutions are focused on delivering skill sets designed to keep our industries competitive

in a global economy.

L A B O R

In addition to being well-trained and well-educated, Oklahoma’s industrial workforce provides a cost-effective advantage for new and existing businesses and industries.

MidAmerica is located within Mayes County where over 30% of the county employment base is engaged in manufacturing. This significantly exceeds Oklahoma’s average of 13%, according to the latest report by Oklahoma Employment Security Commission.

MidAmerica industries draw employees from the area’s vast labor supply. Over 101,000 people currently live within a 20-mile radius of the park. In a 30-mile radius, the population reached over 328,000 in 2009 with over 913,000 recorded to be living in a 40-mile radius of the park.

Oklahoma provides a thoroughly trained labor force educated through an impressive network of secondary, vo-tech and higher education institutions.

As the nation’s foremost program, the Oklahoma Department of Career and Technology Education offers customized training FREE of charge for companies establishing or expanding new businesses in Oklahoma. The FREE customized Training for Industry Program (TIP) is offered locally through the Northeast Technology Centers, which has an industry-training center in the park.

In 2009, the average unemployment was over 9,000 people in the primary labor force area for MidAmerica. The total labor force was nearly 140,000 people. The six county labor force area includes the counties of Mayes, Cherokee, Craig, Delaware, Rogers and Wagoner. Also, according to the U.S. Bureau of the Census, over 4,700 people leave Mayes County each day for work in the surrounding counties. This is up from over 3,300 people in 1990. Thus, a company has an opportunity to attract these workers.

More specialized courses in advanced manufacturing processes are offered at the park by OSU Institute of Technology. A nationally recognized leader in the teaching of advancing technologies, OSU Institute of Technology is an accredited college with vast experience in increasing employee skills and productivity. Many classes offered by the institution may be taken for college credit. OSU Institute of Technology is housed in a 12,000 square-foot technical training center located near MidAmerica’s Administrative Offices.

Our workforce is also well accustomed to shift work. Approximately 60% of the employees at MidAmerica businesses and industries work either a 2nd or 3rd shift rotation.

WORKFORCE ADVANTAGES:	
	TWO Industry Training Centers
	AMBULANCE Services Center
	20-MILE RADIUS: 108,389 (2014)
	30-MILE RADIUS: 352,714 (2014)
	40-MILE RADIUS: 953,371 (2014)
